Heerlen Sunday 20-7-1906

Signor Pietro Garitto
Piazza Paolo dal Novi 3/7
16129 Genova
Italy.

Dear Sir:

In your letter of 14 March 1906 you wrote that in August '06 the congress would be held in Denmark. Up till now I did not yet hear anything about it, so I think that there are too many difficulties and that for the present the congress will not take place. Of course I think it a great pity, for I liked to make my acquaintance to many persons, who have the same interest as me. Therefore I write you now in order to maintain some contact. At the moment my daughter Else and her husband + her 2 daughters are in Denmark and it may be that they meet there Mr. Thomsen. I myself don't like to travel. I like more to look after Artefacts here at Heerlen. Speciel the last years I found much filled materials, which surely cannot be very old; f.i. a piece of *Terra sigillata*, some pieces of *Terra negra*, filled pieces of Bone, fragments (splinters) of glass, of earthenware, pieces of cement, concrete, of priming, wood, brick etc.

From this it proves that the creativity of man goes on from the Stone Age up till now, but now it takes place in the factory and its figures are made of plastic or china. and they are to be bought in the shops.

I need not much to write about this and therefore I made some drawings that they are clear enough. For even drawings are sometimes misunderstood for artefacts is this still more the case. The amount of artef. is so great and the numbers of animals also and quite different of ours that there is much to study and to write about it. But for to day I stop with it and I greet you and your wife very cordially.

Yours truly

H. Andronko
