Dear Jean, *lovie*

I received your good letter upon my return from the Language Origins Society Meeting at Oxford University where I spoke on the Hologenic origins of language with culture. Once given the Quantavolution Theory, from which the hologenesis theory derives, it is not difficult to extend it to

derives, it is not difficult to extend it to Primeval Sculpture or to Language. ~~Thanks for sending the Musch article.~~ Perhaps we can publish a revision of it for our book. Let us keep it in mind. Perhaps you could add titles to his bibliography and send the list <sup>a</sup>round so that others can add to it, and finally we can publish the list in the book.

I agree with you that the meetings at Saignon was pleasant and productive. My moment of anger was precipitated when Licia asked me why the meeting was falling into confusion; the more significant fact was my worry that the Mayor of Saignon, whom I had not met before, might be offended by his being asked to demonstrate the photocopier and to repair it by strangers. For I hope to get more concessions for our "Society" in Saignon or Apt or Luberon generally. Also, I was concerned that Philip not be treated as a servant or acolyte but as a junior partner, and therefore was not to be ordered around or kept from the proceedings. One of the remarkable reversals of the Age is that the young are no longer revolutionary intellectually and scientifically and we must treasure the few who offer themselves.

I shall be writing J.E. Musch and Ron Williams about our book. We may hope that Lithiques will publish it but in any event the book should be produced. In any agreement with Lithiques, Please get their written assurance that we may go ahead and publish the work in any form, and, if convenient, from the pages of magazine print themselves, without re-composing the whole work.

regards to your family from Ami and myself

Sincerely yours,

Alfred

*Musch has sent me his article "Annual Farm- In This The one that you copied in Saignon? If not, I will copy it & send it to you, and you might send me a copy of the one that you made.*
