### A CURE FOR EVERY EVIL A DICTIONARY OF EVILS

Formula of dictionary = Evil. Definition. Discrimination. Division into parts. Cures, individual and social. Dependence upon other cures (cf. medical cures where as the disease attacks an organism (person) the cure for the symptom or disease causes or provokes disease of other parts of the organism (side-effects, unforeseen effects, overburdening of other parts of the organism, etc.)

use \* { Do ordinary day's newspaper (NYT)  
Wash Post  
Go to Streets, 100 y ago & do same  
Anyone can perform the same exercise.

#### Index:

also go to Roget's thesaurus for full list of negative and evil words, and also to Lasswell's Power and Society for the crucial politically relevant evils and also to a text on social problems and then survey a newspaper (NYT) for all the evils discussed over a week's time, etc. until a full index is had.

It appears at first glance that about 600 individual items will appear, augmented by an average of five distinct branches or sub-categories or species, totalling 3000 in all.

wordage. Average of 250 words for each = 750,000. 3000 pages if 1 p /w. Or if three column 8.5 x 11 p = 3/p = 1000 pp.

A.T.D.S.

- alcoholism
- automobile accidents
- birthing excess
